Michal Kozák

IT admin turned DevOps guy who tries to learn everything at once all the time.

Employment History

Cloud Platform Engineer at Ataccama Software, s.r.o., Prague

November 2020 — Present

Developing and maintaining IDP stack in Azure, incl. self-hosted GitLab, Artifactory or Harbor. Go-to guy regarding CI/CD pipelines, build and release processes. Helm chart pipelines and development. Automatization scripts in Python/Bash/Groovy, Docker images optimalization, monitoring with Grafana and Prometheus/VictoriaMetrics, configuration as code using Terraform/Terragrunt, simple Gradle plugins.

IT/System Administrator, DevOps at GRIP Digital, s.r.o., Prague

April 2019 — November 2020

Do-it-all role, from desk-support to DevOps. Deployed back-end for unannounced project to AKS, including NGINX Ingress or ELK. Later moving the same project to EKS, utilizing NLB, CloudWatch, S3, and more, including CI/CD pipeline from TeamCity using Docker images. Also managing company's on-prem infra with a multitude of internal tools (Plastic SCM server, YouTrack, Upsource and others).

IT Administrator at 2media.cz, s.r.o., Prague

September 2012 — September 2020

Remote tech support for Windows and macOS machines, Ubuntu VPS management with custom Postfix server, Let's Encrypt and OpenDKIM.

Digitization & IT Administrator at Universal Music, s.r.o., Prague

April 2010 — April 2019

Responsibility for all IT, on-site support (SW/HW), local Windows server, Active Directory, basic HTML/CSS coding, AS/400, audio mastering, video processing.
